

# VALORACIÓNS DO CAMPIONATO GALEGO DE NATACIÓN ALEVÍN DE INVERNO XUNTA DE GALICIA

## Participación

Analizando as inscricións para o Campionato Galego Alevín, temos que hai un menor número de participantes ca tempada anterior e en consecuencia, temos unha menor participación total no sumatorio de participacións. Pero se miramos cantas de esas participacións son con mínima e cantas son con mínima B, temos que o porcentaxe de mínimas A desta tempada con respecto a anterior e maior, e en consecuencia menor o % de mínimas B.

- % mínima A 24-25: 79,24%
- % mínima A 25-26: 86,48%
- % mínima B 24-25: 20,76%
- % mínima B 25-26: 13,52%

Se comparamos estes datos cos dos resultados da liga Galega, temos que ambos nos din o mesmo, **aumenta participación con mínima.**

Por tanto, o axuste feito nas mínimas nesta tempada creo que foi positivo para esta categoría xa que permitiu aumentar a participación con mínima e reducir a participación con mínima B, aínda que o número total de participantes descendese. No caso de que non axustásemos as mínimas de participación, teríamos menor número de participantes total e maior % de participación con mínima B.

## Resultados

O nivel dos resultados neste Campionato en comparación cos da tempada pasada é o seguinte:
